

## ABSTRACT OF THE DISCLOSURE

A fishing pole has a handle and a rod. The rod is carried by the handle. The rod has a base, an elongated coil spring, a first rod portion and a second rod portion. The elongated coil spring is mounted axially of the rod and adjacent to the base at a proximal end. The first rod portion is carried by the coil spring at a distal end. The first rod portion has a distal tip end terminating in a first line guide. The second rod portion is carried by the rod. The second rod portion has a distal tip end terminating in a second line guide
